

HTML Tutorial

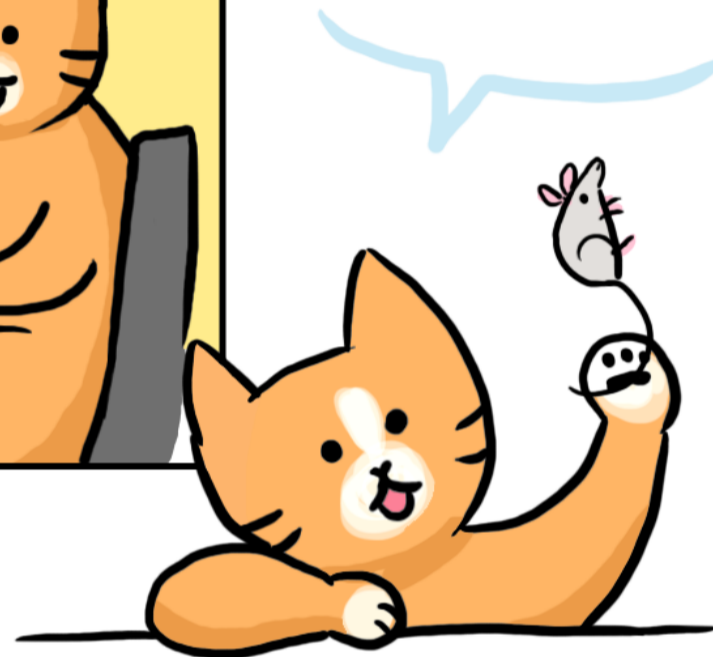

Page 3/10

Let's make your name a heading by putting the **h1 tag** around it. This helps to visually separate content on your site.

Try using an h1 tag by changing the text to something like this:

```
<h1>gizig's Website</h1>
and click save.
```

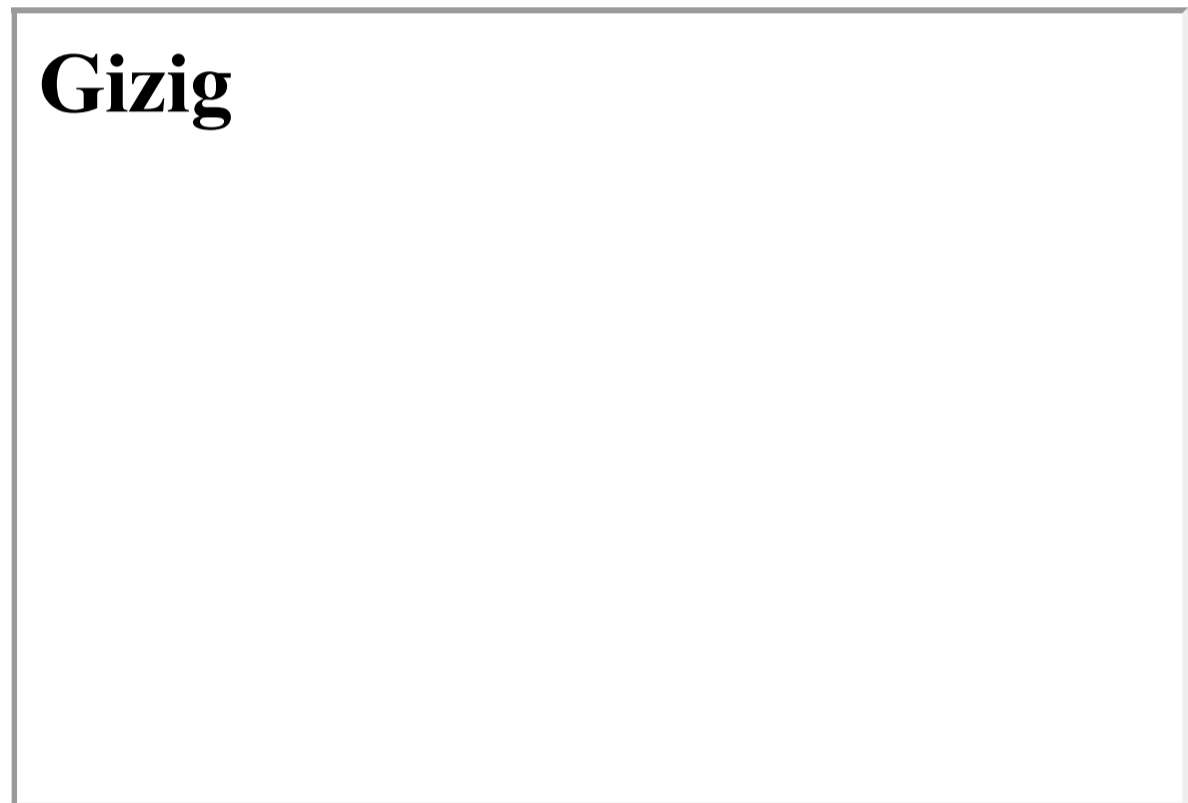

HTML

Reset

Save

```
1 <!DOCTYPE html>
2 <html>
3 <body>
4
5
6 <h1>Gizig</h1>
7
8
9 </body>
10 </html>
```
