HTML Tutorial
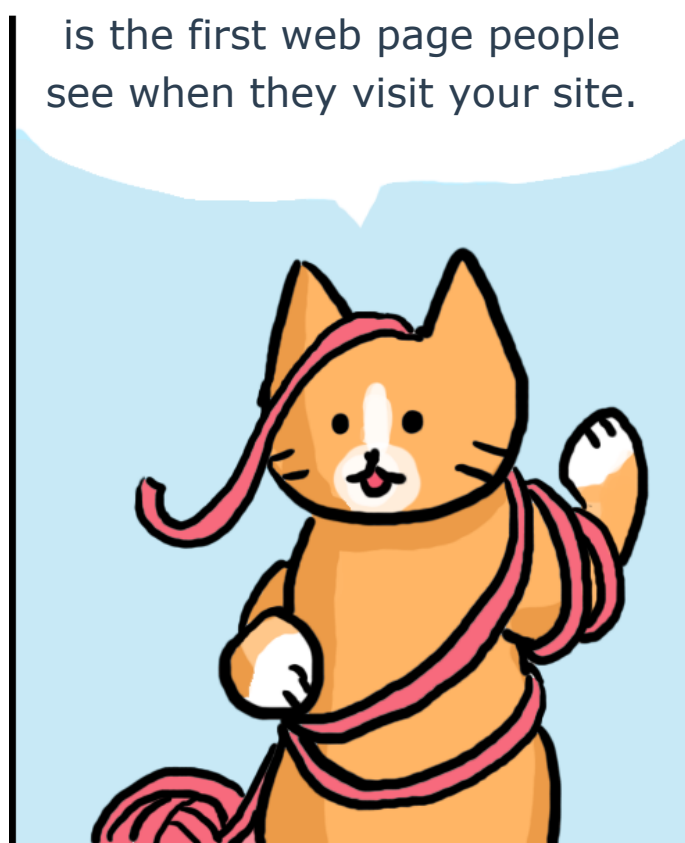

Great work! You can save everything you've coded so far to your Neocities site to continue working on it. It'll be saved as **index.html**, which is the first web page people see when they visit your site.

You can find and edit index.html by visiting your Neocities dashboard.

Saving your tutorial work will replace anything currently in your index.html. If you've modified it before, make sure there isn't anything valuable there before you proceed!

Save to gizig.neocities.org   Don't Save
